DETAILED ACTION

Applicant's election without traverse of species (a) in the reply filed on 11/01/2005 is acknowledged.

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1 and 7-10 are rejected under 35 U.S.C 102(e) as being anticipated by

Matsumoto, US Patent Application Publication No. 2004/0174484.

Art Unit: 2871

The above claims are anticipated by Matsumoto's figures 3-4 which disclose a liquid crystal display device comprising:

. an active matrix substrate (101) with a plurality of gate lines (102), drain lines (106), switching elements (TFTs), pixel electrodes (112), counter electrodes (111);

... another substrate (201);

. the counter electrode being above the drain line (see figure 4), having a groove (slit 115) extending along the drain line direction as claimed (see figure 3);

. an orientation film (116) as claimed.

Allowable Subject Matter

5. Claims 2, 5-6 and 11-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
